

I live in a suburb of Des Moines, Iowa. I drive 45 minutes to and from work every day in heavy interstate traffic. I love listening to K-Love while in the car. I helps me wake up with a positive attitude and keeps me from having "road rage". Sometimes at the end of the day it's nice to get in the car and relax and have some positive encouragement from other believers to here in stead of some of the junk that plays on all the other stations broadcasted here in town. At work we have an old radio in the back room that we can listen to throughout the day if we can get a station in. Alot of my other co-workers are Christians just like me who love listening to this station. We are truly blessed because for some godly reason we are able to get K-love in on that radio most of the time. I know that we all would be very dissappointed if we lost that signal. I hate the thought of losing my K-love signal because I donate \$20 a month to this station to see it stay strong and keep growing because I've how much of a difference it makes in the lives of people. Some of the songs of K-love touch my heart and soul so much that it makes me tear up in the car. I sing some of the songs at the top of my lungs because I believe in what they say so much. This is a great station because it had no commercials which is something all listeners hate about radio. Alot of times they break up music with Bible verses and short stories or testimonies. I love K-love and so does my family and co-workers. I need it as a healthy part of my Christian walk. Please don't take this radio station away from us. It's so important. Thank you for your time.
